Portfolio: <https://rohit-yadav-portfolio.vercel.app/>

Professional Summary:

Detail-oriented Senior Software Engineer with 8+ years of experience building scalable SaaS applications and backend solutions using PHP, Python, and JavaScript. Proficient in AI-enabled systems, RESTful API development, database design, and Docker-based environment configuration. Strong foundation in full software development lifecycle, Agile methodologies, and cross-functional collaboration. Passionate about delivering high-quality, efficient, and maintainable code with a focus on backend stability, automation, and system integration. Adept at problem-solving, mentoring junior developers, and continuously learning new tools and technologies to stay ahead in a fast-evolving environment.

Work Experience:

Zenbundle, Dublin, Ireland (Permanent Role)

Senior Software Engineer (Aug 2025 – April 2026)

Key Roles:

- Led end-to-end development of Shopify-integrated SaaS features, delivering production-ready backend services in Python (FastAPI) and scalable frontend interfaces in React and TypeScript, improving merchant experience and app performance.
- Designed and optimized REST APIs and real-time data pipelines, deploying high availability microservices on Docker and Kubernetes with automated CI/CD pipelines, resulting in faster and more reliable releases.
- Reduced merchant onboarding time by nearly 50% by optimizing workflows and implementing automation.
- Implemented comprehensive unit testing using Pytest, reducing regression issues and improving overall code quality across releases.
- Built and integrated AI agents with ML-driven workflows using Claude LLMs, MCP, and N8N. Collaborated closely with the CTO to shape technical direction and uphold strong engineering standards through code reviews, testing, and mentorship.

Provident CRM, Dublin, Ireland (Permanent Role)

Developer (Jul 2022 – Nov 2024)

Key Roles:

- Designed, developed, and maintained backend solutions for SaaS-based CRM platforms using PHP and JavaScript, contributing to highly customized implementations based on client needs.
- Built and consumed RESTful APIs for third-party integrations and plugin development for SugarOutfitters.
- Led end-to-end migration of legacy SugarCRM systems to newer versions, ensuring data integrity and system stability, and created reusable documentation to accelerate future migrations across teams.
- Managed seamless deployment and upgrade workflows across QA, UAT, and production environments, following Agile methodologies.
- Maintained and optimized MySQL databases supported QA engineers with test environment setup, and ensured consistent environment configuration and deployment using Docker.

LinkedIn, Dublin, Ireland (Contract Role)

Software Engineer (Oct 2021 – Jun 2022)

Key Roles:

- Responsible for the creation and management of Python-based web crawling scripts and implementing new features as part of the Job Ingestion Team.
- Utilized the Scrapy module in Python for efficient data scraping and data cleansing.
- Proficient in troubleshooting and debugging to ensure seamless operations.

QA Infotech, Noida, India (Permanent Role)

Senior Software Engineer (Aug 2020 – Jan 2021)

Software Development Engineer- II (Aug 2019 – Jul 2020)

Software Engineer (Jun 2016 – Jul 2019)

Key Roles:

- Developed and integrated RESTful APIs using Laravel, Flask, and Python-based frameworks, enabling seamless data extraction, ETL workflows, and communication across distributed systems.
- Designed and executed automated test suites using PHPUnit for backend services and APIs, ensuring stability of legacy systems and reducing production defects during releases.
- Built and optimized web scrapers using Dexi, Scrapy, JavaScript, and jQuery, incorporating data cleansing, grammar correction, and categorization with Google NLP for high-quality structured outputs.
- Utilized Eloquent ORM and MySQL for efficient data modeling, storage, and retrieval, ensuring scalable and maintainable backend solutions.
- Implemented analytics and monitoring solutions, including Google Analytics and AWS services (SQS, Lambda), to enhance system reliability, automation, and data-driven insights.
- Improved frontend user experiences by resolving UI issues and enhancing React components for better usability and performance.
- Delivered features and fixes within Agile environments (Kanban & Scrum), collaborating closely with cross-functional teams to ensure timely project execution.
- Mentored junior developers on architecture, debugging, and coding best practices, contributing to overall team performance and code quality.

Education and Qualifications:

2021 – 2022	Master of Science in Data Analytics National College of Ireland	Ireland
2012 – 2016	Bachelor of Technology in Computer Science and Engineering Amity University Madhya Pradesh	India

Technical Skills:

- **Programming Languages:** Python, PHP
- **Web Programming:** REST APIs, HTML, CSS, JavaScript, React, JQuery
- **Frameworks:** FastAPI, Laravel, Flask
- **Databases:** PostgreSQL, MySQL
- **Cloud Platforms:** AWS Lambda, SQS, EC2
- **Version Control:** Git
- **Operating Systems:** Ubuntu, MacOS
- **Other Tools:** Docker, Postman, Pytest, PHPUnit, SugarCRM, Jira, Google Analytics, N8N, Claude, Algolia

Honors/Certifications:

- Docker Foundations Professional Certificate (2025)
- Programming with Python Professional Certificate by OpenEDG Python Institute (2025)
- Certified Sugar Developer Specialist (2023)

Languages: English (fluent), Hindi (native), French (beginner)
